

SAVE THE CLIMATE *for* OUR GRANDCHILDREN

According to the UN (IPCC climate report, summer 2021) climate change will have devastating consequences for future generations. Sweden, with its historic and still increasing emissions, is a large contributor.

The climate threat is increasing more rapidly than media and politicians previously have admitted.

We, the grandparents, demand from politicians:

- ✱ Listen to climate research
- ✱ Comply with, and sharpen, the Climate Act as agreed upon by 7 out of 8 political parties in 2017
- ✱ Dare to take the decisions necessary for our grandchildren's future
- ✱ Act now!

GRAND PANTHERS make these demands at the Riksdag on the last Wednesday of every month (*see* grandpanthers.se).
